

KALIBER A STRONG FOUNDATION FOR FUTURE DAIRY COWS

DEDICATED CALF PROGRAM

The Kaliber® calf rearing plan is a balanced program for a vital start of your calves. This nutritional program results in **HEALTHY DAIRY COWS** with a **HIGHER PRODUCTION LIFE**. And that is good for your returns!

The Kaliber program by De Heus represents a breakthrough in calf rearing, built on over a century of expertise and practical know-how from all over the world.

Investing in Kaliber means investing in a future of higher productivity and profitability!

Designed to optimize the first 24 months of a heifer's life, the Kaliber plan tailors feeding strategies to your farm's specific needs, ensuring the development of strong, healthy heifers.

First calving at 24 months.

Up to 15% more milk in the first 3 lactations.

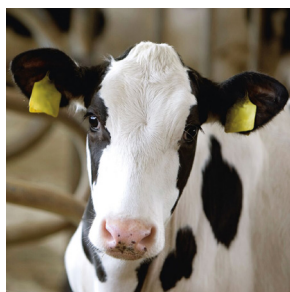

Higher productivity and profitability.

Week 4	5	“ “ “		
Week 5	5	“ “ “		
Week 6	5	“ “ “		
Week 7	4	“ “ “		
Week 8	3	“ “ “		
Week 9	2	“ “ “		
Week 10	2	Weaning when >1.7 kg		
2 - 5 months	—	Unrestricted (fresh daily)		
AFTER BIRTH	KALIBER JUNIOR / SENIOR			
5 - 9 months	—	2.5 - 3 kg Kaliber Junior	ad lib	Straw, silage, green fodder
8 -14 months	—	2.5 - 3 kg Kaliber Junior	ad lib	
After AI	—	2.5 - 3 kg Kaliber Senior	ad lib	

The Kaliber program consists of high quality compound feed, fitting each specific growth stage of the rearing period. The products are specifically designed to cover all nutritional needs of the calves and heifers.

KALIBER STARTER

- Tasty and highly digestible feed that stimulates early intake.
- Optimal quality of protein to stimulate youth growth.
- Specially formulated to stimulate rumen development.

KALIBER JUNIOR

- Well balanced level of energy and protein.
- To create optimal growth and healthy animals.
- Stimulates good carcass development.

KALIBER SENIOR

- Balanced nutrients and minerals fitting last phase.
- Ideal ratio of protein and energy to avoid fatty animals.
- Ideal nutrition to prepare and support during pregnancy.
